

Jeff Miller was raised on a research farm in southern Idaho. He earned a B.S. degree in Botany—Biotechnology from BYU in 1994 and M.S. (1996) and Ph.D. (1998) degrees in Plant Pathology at Washington State University working on potato late blight. Jeff worked for two years at the University of Minnesota and six years at the University of Idaho in Aberdeen as a potato pathologist conducting research on diseases important to potatoes. Jeff now operates his own private research business in southern Idaho, Miller Research, where he conducts research on crop production and pest management. Jeff also currently serves as Treasurer on the Executive Board for the Potato Association of America.
