

Dr. Linda Schott is the Research Chair for Potato Sustainability and Associate Professor in the Department of Plant Sciences. Prior to joining the U of M in July 2025, she was an Assistant Professor and Extension Specialist in Soil & Nutrient Management at the University of Idaho for six years. She earned her B.S. and M.S. degrees from Iowa State University and her Ph.D. in Agricultural Engineering from the University of Nebraska-Lincoln. Dr. Schott's research program encompasses topics of agronomy, soil health and fertility, disease & pest management, post-harvest storage, and water management, including irrigation. Her work incorporates laboratory studies, small-plot experiments, and on-farm research trials.
