Holidays

# POTATO MINUTE

POTATO GROWERS OF ALBERTA

December 12, 2019

## Executive Director - Terence Hochstein

As 2019 draws to a close, most growers across North America are anxiously waiting for the calendar to flip to a new year. In some cases, the end of this past decade will not come soon enough, as some growing areas have had three to four years of a 'less than desirable' crop. If one keeps up with the latest news from across the continent, it appears that the supply of available frozen product will be

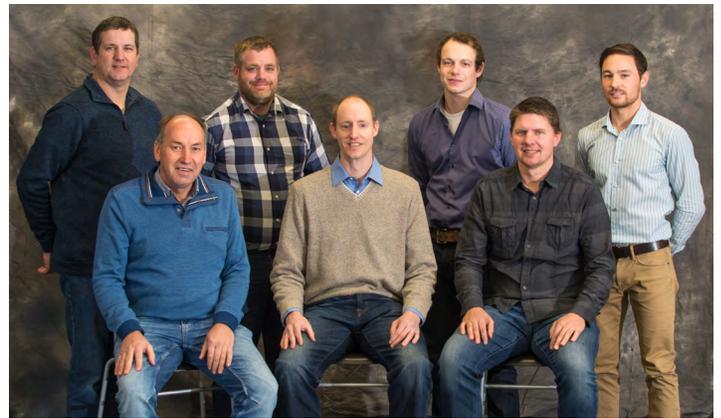

very tight this year. Every processor is doing their utmost best to keep their customer's needs met, as well as looking for new business around the globe. This situation should be beneficial to the growers as most areas are entering into a new contract era, following many two and three year contracts, that have now expired. As the processing industry continues to expand across North America, it provides another opportunity to the seed growers here in the province. The demand for high quality seed continues to rise as growers continue to realize that some of the best seed in the world comes from our Alberta seed growers.

The initial feedback from about 440 delegates that attended this year's Alberta Potato Conference and Tradeshow, was that it was a resounding success. From the 64-booth tradeshow, an excellent Partner's Program, to the vast array of speakers, there was something available for all that attended. We would like to thank the growers, their families, industry and all of our sponsors who joined us to make this event the success that it was. It is encouraging to the PGA Team to see our numbers rise each year, as the Alberta Potato Industry continues to strive. The number of young growers and their families in attendance continues to be the envy of every other growing area across North America. I truly believe our industry is in good hands as we move forward into the next decade.

Planning for next year's event is already in the making. The 2020 Alberta Potato Conference and Tradeshow will be held November 17th-19th, 2020 at the Cambridge Hotel in Red Deer again. Its not too early to book your rooms now.

As it is customary after our AGM, I would like to formally introduce our new PGA Board for the upcoming year:

Back L-R: Michel Camps ( Vice Chair), Jeff Ekkel (N. Area Director), JP Claassen (Director-at-Large), Lyndon Nakamura (Director-at-Large),  
Front L-R: Tony Bos (S. Area Director), Russ Van Boom (Chairman), James Bareman (Director-at-Large)

I look forward to continuing to work with these gentlemen in the coming year. Every one of them invested a great deal of time and effort away from their own operations, to make our organization the success that it is. They continually strive to listen to all of our members and move the organization forward in a positive manner.

With Christmas just around the corner, I would like to take this time to personally extend a Merry Christmas and a Prosperous New Year to everyone in our industry on behalf of my wife Lynnette, my family and myself.

Until next month,

Terence

Seed Update	2
Tribute To Deb Hart	3-4
Ag Director's Update	5
Provincial News	6
National News	7-8
From the Office	9-10

## PHT

The post-harvest test samples for the grow out were planted on November 25 with crew from Saskatchewan and Manitoba, at our site in Hawaii. Weekly reports will be forwarded to those who sent samples and inspections between January 9-17th.

If anyone is interested in visiting the site, please contact me and I'll provide information on location. I will be on site the week of January 13th while the inspectors are there and will forward the preliminary results to those that sent samples. If you didn't send your testing requirements to Phyto Diagnostics, please do so asap, as they have to prepare for the number of samples they must pick.

## Seed Availability

With less than optimum harvest conditions in Canada and the US, many seed acres were not harvested. If you are a seed grower, don't hesitate to contact your customers and confirm their requirements now and if you purchase seed, please contact your seed grower, as most farms are already sold out. Just a reminder, if you received calls from the US, your seed must meet the PCN requirements – confirm with your local CFIA office if you aren't sure of the status.

If you are planning to import seed from the US, please contact me and I'll provide information on what requirements must be met.

## 2019 Seed Directory

If you attended the AGM last month, you received a hard copy of the seed directory, and/or on a memory stick. If you missed the AGM, you can find the directory on the website under the [Alberta Seed Potatoes](#) section.

## AGM Seed Day

For those of you who weren't able to attend the AGM, Dr. Ron Howard provided a presentation on issues that may occur in storage, and what to look for, due to the less than perfect growing and harvest conditions. If you would like a copy of the presentation, please let me know.

# Tribute To Deb Hart On Her Retirement After 15 Years

Our Seed Coordinator, Deb Hart announced that she would be officially retiring from the Potato Growers of Alberta effective December 31, 2019. She has agreed to stay with the PGA on a contract basis until a suitable replacement is found and trained in the new year.

The Potato Growers of Alberta hired Deb as the Seed Coordinator on May 11, 2004.

*"Over the years, Deb created a Seed Coordinator position that is the envy of every potato grower organization in North America. She is the go-to person in the seed industry"* - Terence Hochstein, PGA ED. She is highly respected by her peers and those who have worked alongside of her.

*"Deb has been a tremendous asset for the potato growers here in Alberta. The passion and knowledge that she brings to her tasks is second to none. Her involvement across the country and across the continent has led to the strong position Alberta and Canada enjoy in the potato industry today"* - Russ Van Boom.

She is highly respected by her peers and those who have worked alongside of her. Deb has been a great mentor to so many of us and she is not just a co-worker, but a strong leader of the PGA team and a genuine true friend. We admire her sense of humor that she brings and her bubbly personality.

One ironic statistic stands out as far as working with a generation of growers, Deb began when Ernie Van Boom was the PGA Chairman, and after 15 years, his son Russ Van Boom is the current Chair.

We wish Deb a long and happy retirement, filled with all the things that bring her the utmost joy...her family and her kitties. We are so very proud of this amazing woman!

2004 CHC Conference

October 2005 Deb hosting Chinese Delegation promoting Alberta Seed

2011 Deb and fellow office staff celebrating Margie's Retirement party

"It's hard to believe, the conversation we had that led to your being hired by the PGA as seed coordinator was 15 years ago, how time flies.

"not only did you learn the industry quickly you were able to take a leading role locally and nationally. Your roles at Alberta Seed Potato Growers, PGA, CHC, the Seed Potato Sub Committee and the annual post harvest test for example, earned you the respect and admiration of your peers."

"Your dedication and hard work will be missed in Alberta, Nationally and Internationally.

Best Wishes to you for a well deserved long and happy retirement."

- Vern Warkentin, Former Executive Director

"I first met Deb Hart about 18 years ago, when she worked in Saskatchewan in the potato industry. How time flies. I remember when Vern Warkentin brought Deb to the Alberta team about 15 years ago.

Deb has always been devoted to the potato industry and has many accomplishments to be proud of. Just to note a few, she was instrumental in bringing the Alberta seed potato industry as a very respected organization nationally. She has worked endlessly for the betterment of the seed industry for western Canada. Being the Seed Potato Coordinator, for the PGA, I have had the honour and privilege to work with Deb on many committees and issues the potato industry had faced."

- Bill Zylmans, Canadian Potato Council Chair

The impact from Deb Hart on national priorities with the Canadian Potato Council (CPC) over the years is well recognized by our provincial members. Deb has always demonstrated a quick response to volunteering to support those issues of importance to potato growers.

She has tirelessly served the seed potato growers of Canada as Vice Chair of the Seed Potato Sub Committee of the CPC, CPC representative of the AAFC Seed Sector Value Chain Roundtable and as the ministerial to the Plant Breeder's Right Advisory Committee. Contributions have also included presenting expert testimony on Plant Breeder's Right to both the House and Senate Standing Committees on Agriculture.

Alberta growers have been represented well in CPC national activities. Through work on the Potato Task Force, Deb's contributions to document the negative impacts of proposed CFIA policies on Canadian potato growers, including a decision to cease seed tuber inspection and revise cost recovery fees has been invaluable. Ongoing input and support with various working groups addressing specific potato sector issues include "true Potato seed" and "potato cyst nematode". Export market development and market access for Canadian seed potatoes has benefited through Deb's membership on the Potatoes Canada Steering Committee.

The wealth of experience and knowledge that she has given back (especially in the seed industry) has directly resulted in the many successes for the potato industry in Canada, will be missed.

Personally, her friends and colleagues on provincial grower organizations from coast to coast will miss future conference calls and meetings along with her sense of humor, laughter and positive outlook.

## In Case You Missed It Research Update Re-Cap

The Research Update Session at this year's AGM was quite well attended, and a lot of information was given very quickly, due to time constraints. I thought it would be beneficial to do a re-cap and to let you know where you can find more information plus a brief overview of my presentation.

Let's start with my presentation for the AGM Research Update:

The PGA continues to support the following National Research Cluster CAP Programs:

- Colorado Potato Beetle
- Late Blight Strain Tracking
- Wireworm Project
- National Variety Trails
- Provincial Variety Trials
- Control of Early Dying Complex (this project formally received funding this fall, as a four year project).

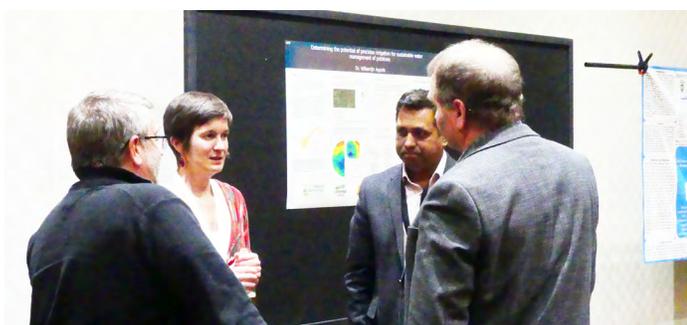

Second year interim reports will soon be available for these projects on our website. In the New Year, there will be updates on the provincial Cap Programs as well.

The two provincial CAP programs that the PGA is working directly with; the Insect Monitoring Program and the Late Blight Risk Management Program, have operated smoothly this last year. What was new for 2019, was that the labs of the University of Lethbridge Potato Research Chair were utilized in performing the testing and diagnostic work for both the psyllid and late blight detection programs. The University labs managed the testing for both of these programs very efficiently and there were no issues.

The Insect Monitoring Program did not detect any potato psyllids in 2018, and only one in 2019. The one psyllid trapped in the insect trap cards tested negative for the Lso virus. The Late Blight RMP program also ran very effectively in this year. The late blight spore trap network was able to detect disease pressure hot spots, and helped to isolate potential sources of the late blight disease transmission.

*Russ Van Boom checking out Dr. Jonathan Neilson's poster presentation*

*Dr. Willemijn Appels speaking to several interested listeners of her irrigation presentation*

Additionally, the PGA continues to be actively involved in the three provincially funded CAP programs:

- Ag Literacy Program – led by the Crop Sector Working Group
- Irrigation Efficiency – in conjunction with Sugar Beet and the Alberta Canola Council
- Variable Rate Irrigation – led by Lethbridge College.

For the national CAP programs, the first year reports are on the memory stick that you received at the AGM registration desk. These reports can also be found on the PGA website.

At the AGM Research Update session, we had 3 presenters:

- Colby Robertson: University of Lethbridge, Grad Student. Exploring Fumigation as a Strategy to Manage Potato Early Die in Southern Alberta.
- Dr. Willemijn Appels: Mueller Applied Research Chair, Lethbridge College. Variable Rate Irrigation
- Dr. Dmytro Yevtushenko: University of Lethbridge, Potato Research Chair. Updates on Potato Research Chair program.

These presentations will also be posted on the PGA website. This year, the Research Update session at the AGM also included a poster session, which was a new addition and quite well attended. The Researchers that were displaying posters at this session were very impressed with the amount of interest and questions that they received. As a new addition to the AGM, the PGA will be asking the membership for their feedback. Please let us know if you found this session to be of value.

Season's Greetings

thomas@albertapotatoes.ca

## Farm Freedom & Safety Act - Bill 26

### What is considered a farm in Alberta for the purposes of occupational health and safety (OHS) under the FFSA?

Included Operations	Not Included	Exempt from any OHS Rules
<ul style="list-style-type: none"> <li>production of crops, including fruits and vegetables, through the cultivation of land</li> <li>raising and maintenance of animals or birds</li> <li>keeping of bees</li> </ul>	<ul style="list-style-type: none"> <li>Landscaping</li> <li>raising or boarding of pets</li> </ul>	<ul style="list-style-type: none"> <li>family members of the owner of a farm or ranch operation</li> <li>the private residence, which includes areas around the home like the lawn area, backyard or garden</li> <li>when people are doing non-work-related activities on their land, such as recreational activities like horseback riding or hunting.</li> </ul>

*\*This definition may be subject to change as the legislation reaches the final approval.*

The Government of Alberta is introducing new legislation that will impact Alberta producers. Bill 26, also known as the Farm Freedom and Safety Act (FFSA) changes current employment, workers compensation coverage, and occupational health and safety requirements for producers.

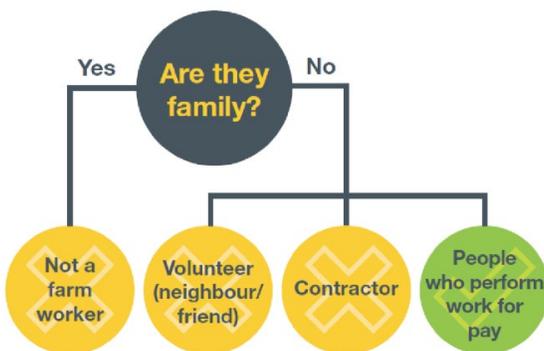

**Effective January 31, 2020**

### What about greenhouses, mushroom farms, nurseries or sod farms?

Current OHS, labour relations, and workers compensation requirements will continue to apply to these operations. They will be included under farming and ranching for the purposes of employment standards only.

### Who is considered a worker?

OHS rules only apply to an operation if a waged, non-family worker is present on the farm or ranch, and then only to those individuals.

### How does the Act Impact my Farm?

Below is a brief snapshot of some parts of the Occupational Health and Safety Act that will be important to your farm operations:

- Part 1: Obligations (Responsibilities)**
  - Establishes the specific responsibilities for employers, supervisors, workers, suppliers, service providers, owners, contractors, prime-contractors, self-employed persons, and temporary staffing agencies.
- Part 2: Duty to Inform (Right to Know)**
  - Employers must provide information that may affect the health and safety of workers including information about the hazards, hazard controls, and the work practices and procedures used on the farm.
- Part 3: Joint Work Site Health and Safety Committees and Health and Safety Representatives (Right to Participate)**
- Part 4: Dangerous Work and Discriminatory Action (Right to Refuse Dangerous Work)**
  - Workers have the right refuse dangerous work.
- Part 5: Program and Practice**
  - Farms with 20 or more workers are required to establish a health and safety program in consultation with their joint work site health and safety committee. This part also describes the circumstances of when an incident must be reported to Occupational Health and Safety.
- Part 8: Compliance and Enforcement**
  - Outlines the role of Occupational Health and Safety officers and what measures they can take to for compliance and enforcement.
- Part 10: Offences and Penalties**
  - Outlines the circumstances of when someone could be found guilty of an offense under the Act and the associated penalties.

### What if I have more questions?

For more information on:

Bill 26: <https://www.alberta.ca/farm-freedom-and-safety-act.aspx>

The Occupational Health and Safety Act visit: <https://www.alberta.ca/ohs-act-regulation-code.aspx>.

If you have further questions about these changes visit [www.agsafeab.ca](http://www.agsafeab.ca) for more updates. If you have specific concerns about your farm contact us at 403-219-7901 or at [info@agsafeab.ca](mailto:info@agsafeab.ca)

"We promised Albertans we would consult first and legislate second - and that's exactly what we did. We've taken this feedback and built common-sense farm workplace legislation that works for people, not against them."

Devin Dreesen, Minister of Agriculture and Forestry *Source: alberta.ca*

## Canadians Want to be Better Connected to their Food

New research shows how Canada's food system can further engage with Consumers

Canadian consumers care now more than ever about their food. New research from the Canadian Centre for Food Integrity's (CCFI) 2019 Public Trust Research Report shows that while 91% of Canadians claim to know little, very little or nothing about modern farming practices in Canada, 60% of survey respondents, meaning three in five Canadians, are interested in knowing more about agriculture and how their food is produced. CCFI surveyed 2,189 Canadians 18 years and older and examined the online conversations of close to 260,000 Canadians.

The 2019 report, 'Connecting with Canadians' provides benchmark data to better understand Canadian's overall impression of Canada's food system and consumers' expectations and sentiment of contentious food-related issues.

Two new tracking trends identified in the 2019 data are Canadian consumers' moderate to strong concerns relating to food fraud (91%) – the practice of mislabeling, adulterating or counterfeiting food products – and concerns with misleading food labels (89%) for the purpose of marketing. Consumers are starting to look more closely at food labels and are asking questions about what certain food labels mean.

"The timing of the research is pertinent considering how food related topics are dominating news relating to plant-based diets, pesticides, genetically modified organisms (GMOs) and consumer's perspective on agriculture's role in greenhouse gas emissions relating to climate change," says John Jamieson, CEO & President of CCFI. "The 2019 research is a key resource for Canada's food system to learn how to better connect with consumers."

The 2019 research is consistent with 2018 data that shows the percentage of Canadians who feel the food system is on the right track out numbers those who feel it's headed in the wrong direction. The data shows that more Canadians

feel Canada's food system is heading in the right direction at 35% of respondents, compared to only 26% of consumers from the United States. More American consumers appear to have disapproving views of their food system than Canadians who appear to better trust their food system.

"As consumers have access to various communication channels and are overloaded with more information relating to their food, **the ability to decipher what is credible becomes more difficult,**" says Kim McConnell, Chair of the CCFI Board of Directors. "Canada's food system can use the 2019 research to better communicate with different types of consumers to help further build the public's trust when discussing their food priorities."

The 2019 research was unveiled at the fourth annual Public Trust Summit in Saskatoon, Saskatchewan from November 13-14, 2019. The 2019 Summit was co-hosted by the CCFI and Farm & Food Care Saskatchewan. Over 230 thought leaders from across Canada's food system – from primary producers, to industry associations, retailers, grocers and agri-food executives – gathered to learn, network, and engage on how to better earn public trust in food.

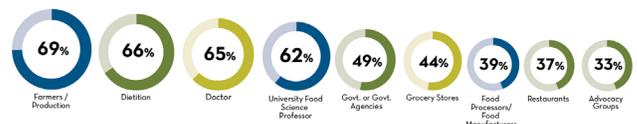

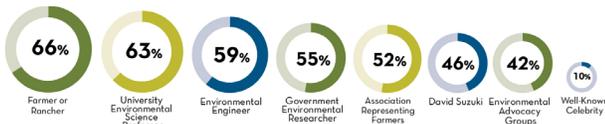

CCFI welcomes those interested in a copy of the 2019 Research Report 'Connecting with Canadians' to visit the CCFI website ([www.foodintegrity.ca](http://www.foodintegrity.ca)) to download the Report or contact the Communications Coordinator to receive a hard copy.

The Canadian Centre for Food Integrity is a national charity with a clearly defined mandate as the service provider to help Canada's food system earn trust by coordinating research, resources, dialogue and training. As CCFI gains traction in Canada, the opportunities for collaboration among industry partners, stakeholders, members and consumers continues to grow. Leading the way in spreading the message of the importance of public trust is key for Canada's food system and its many opportunities.

### WHO DO CANADIANS TURN TO FOR INFORMATION ON FOOD?

When it comes to **farming and environment issues**, farmers are viewed as most credible, followed closely by professors, environment engineers, reserachers, and associations representing farmers.

Most Canadians view farmers as credible sources when it comes to **farming & food safety issues** and around two in three would describe dietitians, doctors, and university professors in this way. Believability scores are lowest for food processors, restaurants and advocacay groups.

## Estimate of Canadian Potato Production Dec 6, 2019

Source: Statistics Canada Table 32-10-0358-01 (000cwt) Dec 6, 2019

Province	2017	2018	5-yr avg	2019 Est.	Diff Vs. 5yr Avg.
NFLD.	63	56	64	54	-15.6%

### Canadian (Seed) Potato Storage Holdings by Province

December 1, 2019 Infohort: AAFC (000 cwt)

Province	2016-17	2017-18	2018-19	3-yr. Average	2019-20	2019 vs. 3-yr. avg
Prince Edward I	2,137	1,943	2,075	2,052	2,245	+9.4%
New Brunswick	2,241	1,991	1,792	2,008	1,818	-9.5%
Quebec	1,057	1,176	1,298	1,177	1,231	+4.6%
Ontario	114	123	128	122	68	-44.3%
Eastern Canada	5,549	5,233	5,293	5,359	5,362	+0.1%
Manitoba	1,690	1,593	1,241	1,508	1,341	-11.1%
Alberta	3,340	2,363	2,900	2,868	3,667	+27.9%
British Columbia	259	202	197	219	138	-37.1%
Western Canada	5,289	4,158	4,338	4,595	5,146	+12.0%
Total Canada	10,839	9,391	9,632	9,954	10,508	+5.6%

Out of all the sectors, the seed category shows the most variability this year, as compared to December 1, 2018. Seed supply is significantly less in New Brunswick, Ontario, Manitoba, and British Columbia. Alberta has the largest seed stocks increase over a year ago driven by increased plantings, good yields, and a successful harvest of most seed acres. Any additional seed available in Canada is readily needed by areas which were unable to harvest all of their crop and by an expanding requirement for planting processing acres.

### Canadian (Processing) Potato Storage Holdings by Province

December 1, 2019 Infohort: AAFC (000 cwt)

Province	2016-2017	2017-2018	2018-2019	3-yr. Average	2019-2020	2019 vs. 3-yr. avg
Prince Edward I	12,880	12,693	11,924	12,499	12,686	+1.5%
New Brunswick	7,600	8,196	8,075	7,957	7,966	+0.1%
Quebec	3,115	3,575	3,347	3,346	3,454	+3.2%
Ontario	2,726	3,306	3,257	3,096	3,124	+0.9%
Eastern Canada	26,321	27,770	26,603	26,898	27,230	+1.2%
Manitoba	13,116	12,626	11,541	12,428	10,749	-13.5%
Alberta	10,742	14,113	12,998	12,618	13,405	+6.2%
Western Canada	23,858	26,739	24,539	25,044	24,154	-3.6%
Total Canada	50,179	54,509	51,142	51,943	51,384	-1.1%

Processing Holdings are down 1.1% below the 3-yr. average. The most significant decrease lies in Manitoba, where growers had extreme weather-related difficulty in harvesting their crop and filling storages. Most other areas have December 1 holdings slightly above their 3-yr average. A year ago, Alberta's holdings were much lower reflecting their rapid shipments of processing potatoes to other areas that were short.

### Canadian (Fresh) Potato Storage Holdings by Province

December 1, 2019 Infohort: AAFC (000 cwt)

Province	2016-17	2017-18	2018-19	3-yr. Average	2019-20	2019 vs. 3-yr. avg
Prince Edward I	5,919	5,539	4,624	5,361	5,572	+3.9%
New Brunswick	2,194	1,999	1,472	1,888	1,590	-15.8%
Quebec	4,409	4,327	3,702	4,146	4,429	+6.8%
Ontario	1,186	1,625	1,182	1,331	1,363	+2.4%
Eastern Canada	13,708	13,490	10,980	12,726	12,954	+1.8%
Manitoba	1,237	1,405	1,097	1,246	1,383	+11.0%
Alberta	683	879	935	832	790	-5.1%
British Columbia	717	614	794	708	713	+0.7%
Western Canada	2,637	2,898	2,826	2,786	2,886	+3.6%
Total Canada	16,344	16,388	13,806	15,513	15,840	+2.1%

Fresh Holdings are 2.1% above the 3-yr. average, at 15.8 million hundred weight in storages on December 1<sup>st</sup>. One of the most significant changes is in New Brunswick (-15.8%) pointing out the shift by growers from the fresh into the processing side of the business. Prince Edward Island returns to more historical levels after harvest issues one year ago. The fresh crop in Quebec was also a good one this year. Although BC had a high producing crop, good demand to fill an initially empty pipeline has brought stocks in line with a 3-yr. average.

From the 2019 AGM

Thank you again to our many sponsors and delegates who help make each Alberta Potato Conference & Tradeshow a huge success!

The Chops & Crops event was held November 25th in Edmonton at the Federal Building. We were fortunate that our Premier Jason Kenney was able to attend and give some insight on many issues facing agriculture in the province and what the government is doing to ensure a strong and viable industry.

The Potato Growers of Alberta had great representation, once again this year. Several were able to have conversations with the MLA's, as well and catch the Premier's ear on different subjects.

Left: Gord Visser (Seed Grower) and Premier Jason Kenney, Right: Terence Hochstein (PGA ED and Grant Hunter (Taber-Cardston MLA)

### Farewell and Best Wishes To our Administrative Assistant Roberta Sebok

Roberta has only been with the PGA for a little over two years and she has been a complete gem to work with. She is so eager to help everyone without any question and her demeanor and friendliness has been appreciated by all.

Roberta and her husband Jerry will be retiring and moving to the Crowsnest Pass in January of 2020. Her last day will be January 10th, so please pop into the office and wish her well.

### 2020 Irrigated Crop Production Update

— January 14-15, 2020

The conference provides irrigated crop producers, crop advisors, irrigation equipment dealers, and others connected to the irrigation industry with up-to-date research results and information on irrigated crop production.

The **CANADIAN AGRICULTURAL  
LOANS ACT (CALA) PROGRAM**

**What is the CALA program?**  
A loan program for farmers and agricultural co-operatives who want to:

- purchase land
- construct or improve buildings
- purchase farm equipment, breeding livestock, and more

**What are the benefits?**

- Up to \$500,000 per farm operation
- Up to \$3 million per agricultural co-operative
- Low interest rates and down payments with flexible repayment options
- Incentives for beginning and start-up farmers
